

Muhammad Jawwad Malik, Chief Executive Officer (CEO)

Muhammad Jawwad Malik is a technopreneur and software engineer with expertise spanning product strategy, software engineering, embedded systems, IoT, artificial intelligence, and full-stack development. His multidisciplinary background enables him to bridge the gap between innovative ideas and real-world technology solutions.

He is passionate about building scalable digital products that solve practical business challenges across multiple industries. With a strong focus on innovation, product development, and emerging technologies, he has led the creation of intelligent platforms that integrate AI, IoT, automation, and cloud technologies into modern business ecosystems.

His leadership philosophy centers on innovation, continuous learning, and delivering technology that creates measurable business value while maintaining a customer-first approach.

Areas of Expertise

- Artificial Intelligence (AI)
- Internet of Things (IoT)
- Product Strategy & Innovation
- Embedded Systems
- Full-Stack Software Development
- Digital Transformation
- Business Technology Consulting
- Scalable SaaS Solutions

Muhammad Ammad Waqar Malik, Chief Operating Officer (COO)

Muhammad Ammad Waqar Malik is an Electronic Engineer with advanced academic training in electrical and electronic engineering. His expertise spans industrial automation, IoT systems, smart technologies, and engineering-driven operational excellence.

He specializes in transforming complex technical concepts into practical, scalable solutions that improve operational efficiency and business performance. His engineering mindset, combined with a structured approach to project execution, supports the successful delivery of innovative technology initiatives.

Areas of Expertise

- Industrial Automation
- Internet of Things (IoT)
- Smart Systems
- Operations Management
- Engineering Project Delivery
- Process Optimization
- Technical Solution Design
- Technology Integration

Hamza Aslam, Chief Technology Officer (CTO)

Hamza Aslam leads the company's technical vision by focusing on scalable software architecture, modern development practices, and emerging technologies.

With a strong emphasis on engineering excellence, he works on designing secure, high-performance systems that support AI-powered applications, IoT platforms, cloud-based solutions, and enterprise software. His approach prioritizes reliability, scalability, and continuous innovation to ensure every solution is built for long-term success.

Areas of Expertise

- Software Architecture
- Full-Stack Development
- AI Integration
- Cloud Technologies
- System Design
- API Development
- Database Design
- Scalable Enterprise Solutions
